

# FUNCTIONAL PROTEIN INGREDIENTS SOLVE PET FOOD CHALLENGES

## SOLUTIONS FOR PROTEIN SHORTAGES & INCREASING PRICES

Pet food manufacturers are experiencing an unprecedented decrease in the availability of proteins and other ingredients along with rapidly increasing prices. This has created a challenging situation not only for manufacturers, but also downstream for pet parents who find themselves searching for quality products that offer not only nutrition, but health benefits as well.

Providing quality, high protein ingredients naturally consumed by dogs and cats is our business.

Spray dried plasma is commonly used in both wet and dry foods, treats and supplements for its functional properties, proven health benefits and palatability.

With the lack of available proteins, plasma can help when blended with more available, less functional co-products to provide the properties and characteristics of the original protein or replace less desirable ingredients.

**Our global manufacturing network ensures we can provide sustainably sourced ingredient solutions to solve your protein shortage challenge.**

70%+ PROTEIN | HIGHLY DIGESTIBLE | PROVEN SCIENCE | HEALTH BENEFITS

### *Plasma offers sustainable solutions*

*Our ingredients offer a unique solution not only for formulation requirements, but also by providing unparalleled health benefits including immune support and digestive health while positively impacting muscles, joints, skin and coats with visible results.*

## COMPANION

### LABEL FRIENDLY INGREDIENTS FOR WET, DRY, TREATS & SUPPLEMENTS

Beef or Pork Plasma  
Natural Flavors  
Hydrolyzed Proteins

### FUNCTIONAL BENEFITS

Immune support  
Digestive health  
Muscle and joint  
Skin and coat

### FORMULATION BENEFITS

Extend or replace other proteins  
Promote wild, natural nutrition  
Enhance labeling and health claims  
Improve functionality of formulas
